

# CREATIVE ARTS THERAPIES WEEK

**March 8 – 15, 2009**

Celebrate the healing arts with

**NCCATA**

the National Coalition of  
Creative Arts Therapies Associations

Throughout the USA during the second week in March, creative arts therapists will be sponsoring special workshops, exhibitions, career days and other events to share their work with the public, and with other professions.

The Creative Arts Therapies include **art therapy, dance/movement therapy, drama therapy, music therapy, poetry therapy and psychodrama**. These modalities are applied in rehabilitative, psychiatric, medical, community and educational agencies. The objectives of the creative arts therapies are to foster health, communication and expression; to enhance self-awareness; to promote the integration of emotional, physical, social and cognitive functioning; and to facilitate positive change in human experience and behavior.

Creative Arts Therapists invite you to join us in this celebration and to visit our Web site **[www.nccata.org](http://www.nccata.org)** for information on specific events in your town, city and state. And we invite you to contact the member Associations listed below if you wish to schedule your own special event.
